

This half term we will
be looking at:

Belonging to a Community

Are there any that you immediately recognise?
These are the logos of various national and international environmental organisations: organisations that help take care of the environment in some way.

Environmental organisations

Main Activity - Research

- The name of the organisation
- What the organisation does i.e. how does it help take care of the environment?
- One, succinct sentence summarising the organisation's work, if they can, e.g. "Buglife is working to save Britain's rarest little animals like bees, beetles, worms and woodlice." (NB: The home page of each organisation's website will usually have a succinct 'What we do' or 'About us' mission statement – you might like to demonstrate how to find this).

Plenary

- How can we support these organisations?
- Do you think these organisations make a difference i.e. do they actually help the environment?
